PROFESSIONAL SUMMARY

Senior Product Manager with 5 years of experience building and scaling B2B/B2C platforms across global payroll, payments, and fintech. Proven track record of driving measurable business outcomes — from recovering €2.4M+ in failed payments to reducing multi-hour, multi-country manual tax distribution system to near real-time automated flow. Experienced in multi-jurisdiction compliance workflows and 0-to-1 product delivery in fast-paced environments. Hands-on experience with AI and automation tooling to drive product delivery and operational efficiency at scale.

EXPERIENCE

Baylis Digital Infrastructures

Oct 2024 – Present

Senior Associate — Portfolio Strategy & Investment Enablement | London, UK

- Supported expansion of \$500M+ pipeline of data center infrastructure projects across four African markets by translating market intelligence, regulatory and demand insights into market entry and investment strategy.
- Built business case models and scenario analyses to stress-test revenue, cost, and pricing assumptions, enabling data-driven decision-making for capital allocation across multiple concurrent opportunities.
- Owned end-to-end due diligence workstreams spanning legal, technical, and commercial inputs, producing structured investment memos that aligned cross-functional stakeholders and informed go/no-go decisions.

Omnipresent

Sep 2023 – Oct 2024

Product Manager — Payroll Processing, Output & Reporting | London, UK

- Reduced payroll tax document distribution from multi-hour cycles to near real-time delivery **across 10+ countries** by leading the design and launch of an automated distribution system, eliminating manual processing bottlenecks.
- Implemented real-time payroll monitoring with alerts and SLA dashboards, enabling engineering and operations teams to detect and resolve processing failures 3x faster, improving system reliability and client trust.
- Led integration across HRIS platforms, external payroll engines, accounting systems, and third-party data providers, improving data consistency and enabling scalable, compliant payroll processing across multiple jurisdictions.
- Drove adoption of new payroll platform capabilities by creating product guides, interactive demos, and operational runbooks, reducing onboarding time for payroll specialists and support teams.

Hands In

Mar 2022 – Nov 2023

Founding Product Operations Manager | London, UK

- Led 0-to-1 development of a white-label split-payment checkout API, onboarding 10+ businesses and supporting €1.6M+ in group payment revenue for travel platforms.
 - Designed and launched a consumer group payment links feature with customizable split amounts, achieving an **87.8% checkout conversion rate** when the lead booker paid first.
 - Introduced multi-card payment flows and intelligent retry logic that recovered **€2.4M+ in previously failed payments** with a 95.1% recovery conversion rate, directly improving platform revenue.
 - Defined product strategy, owned the roadmap, and managed cross-functional delivery across engineering, design, and commercial teams in a fast-paced, early-stage startup environment.
-
